

Wanted Poster

As the international travel and trade has proliferated in the last few centuries, flora and fauna that have the ability to quickly adapt to new habitats, threaten to subsume the ecological niches of endemic species the world over. Smuggled in the holds of a cargo ships, as stowaways on international airline flights, or transported in the soil of unassuming houseplants; invasive species are the outlaws of the biosphere. In this activity, you will create a "Digital" Wanted Poster for an invasive species.

- ✍ You may choose any invasive species you wish.
- ✍ Each poster will include the following categories: "Identifying Characteristics," "Method of Escape", "Aliases," "Crimes Committed," and "Suspected Hideouts." Additional, creative categories will be rewarded with higher grades.
- ✍ You must research your species, and completely encapsulate their list of "crimes" on the poster.
