

AP Environmental Summer Assignment:

Read Chapters 1 and 2 and completely answer all of the review and critical thinking questions at the end of each chapter. Also, complete one of the projects for each chapter. These assignments are due the first day of class in August. There will also be a multiple choice test covering this material the second day of class. Please give this assignment your full attention as it is very important and failure to complete it may result in your removal from the class. Have a great summer and I look forward to seeing you in August.

Mr. Musella
