

SnapGrades: Your 24-hour access to student grades

Hello New Team Discovery Parents:

Team Discovery uses the online grading program SnapGrades for our students. This program gives students and parents 24 hour a day access to the student's portion of our gradebooks.

At summer check-in you should have received a form which explained the procedure for gaining viewing access to your child's section of our grade book. Please contact Mrs. Martin if you still need to sign up. The SnapGrades program allows only two parent passwords, so we ask that if one parent is at another residence, that you pass one of those passwords on to them. Basically, you will log in with your child's name and use a parent password. You will then be directed to create a new password for yourself. You are more than welcome to share the new password you created with another family member you want to have access, but only two total passwords are allowed by system for parents/caregivers.

Your child will be given a separate student password and will be instructed on how to set up his or her account through his or her social studies class.

We hope this resource will give you more information on how your child is doing in school. Your view of your child's page in our grade book is live. If we update a grade, it will immediately post for your viewing. Please remember that just because the grade book is "live", our grading timeline is not. Some assignments will take longer to grade than others and some grading may not be completed until all students have made up the test or quiz. Each of us makes every attempt to grade and give feedback in a timely manner, but we do have approximately 130-140 students and every child's assignment deserves our attention.

Your log in will take you to an overview of all of your child's courses. Please note that only courses taught by a teacher who is using SnapGrades will show. Your child's Exploratory or PE grade may or may not be available depending on the individual teacher. Also found on that page are announcements teachers may post for general information (for example: upcoming due dates, or upcoming tests, etc.). You may then click on any course and you will be taken to a page that shows all of the grades entered for your child in the class.

Snapgrades is set to send a message to your registered email account every Friday afternoon if your student is missing assignments or if a SnapGrades course grade has dropped below a C-. Team Discovery teachers will also use the SnapGrades email feature to send out information updates from time to time. It is very important for you to keep your email address updated in your SnapGrades account. If you change your email address, please change it in SnapGrades so you will continue to receive information regarding your child.

We hope this will become an informational resource to assist our work together to help your child succeed!

Welcome to Rancho Pico,
Team Discovery Teachers
